# Sweeper & Funnel

W: 23 cm / 9,1" D: 7 cm / 2,8"

**Product Type**

Dustpan

**Production Process**

Injection moulded funnel, and brush made of CNC cut wooden handle and horsehair mixed with syntetic hair

**Dimensions (cm / in)**

H: 31 cm / 12,2"

W: 23 cm / 9,1"

D: 7 cm / 2,8"

**Materials**

Plastic, Ash, PP and Horse Hair

**Colours**

Black or White

**Care Instructions**

To clean simply wipe with a soft dry cloth. For stains, please use a light soap such as dishwashing soap on a wet cotton cloth. We recommend using a cloth to dry, afterwards. Do not use any cleaners with chemicals or harsh abrasives.

Winner of the Wallpaper* Design Award in the “Best Fireside” category, Sweeper & Funnel is so blindingly obvious it’s a wonder no one thought of it before. The ash wood sweeper slides out of the funnel to reveal a hole, so dust and ash can be poured neatly into the trash. Ingenious!

**About the Designer**

I’m a product designer based in Warsaw, Poland. I have had passion for creating new things ever since I can remember. I grew up surrounded by objects, models and tools from workshops of my father who was a sculptor and my mother who is an architect.

What fascinates me the most is the process of inventing and producing new things. My ambition is to create objects of high functional and aesthetical values, products that serve the user well. I pay close attention to the usage of materials, neat construction and production process.

My inspiration comes from research and observation. A close functional analysis is always the starting point for a new project. The second stage is creating digital and physical models which let me feel the material and allow to understand the manufacturing process. I believe that close cooperation between a designer and a manufacturer is crucial to create a successful product.
